EDUCATION

National & Kapodistrian University of Athens
Department of Informatics and Telecommunications
*B.Sc. Informatics & Telecommunications | **Grade: 8.02***

Oct 2018 – Feb 2023

LANGUAGES

English: C2 (Cambridge English)
Greek: Native

TECHNICAL SKILLS

Languages: Typescript, Java, Python, SQL
Frameworks & Libraries:: React, Angular, Node.js, Spring Boot, Flask
Identity & Security: OpenID4VCI, OpenID4VP, OAuth 2.0 / OpenID Connect, SD-JWT
Tools: Docker, Git, CI/CD, Linux

EXPERIENCE

Greek Universities Network - GUnet

Software Engineer - Identity Management

Feb 2026 – Present

- Contributed to wwWallet, a digital Identity Wallet to store and present Verifiable Credentials, aligned with state-of-the-art specifications such as OpenID4VCI, OID4VP and SDJWT-VC.

Hellenic Army

Software Engineer (Military Service)

May 2025 – Mar 2026

- Built and maintained confidential internal software systems, visualizing operational data per NATO and US DoD Military Symbolology Standards using Angular and Java Spring Boot.
- Worked in a restricted offline environment, in accordance with ISO 27001 standards.

Netcompany

Consultant – Full-stack Software Engineer

May 2023 – Aug. 2023

- Maintained and developed a full-stack Java Spring Boot application for a Denmark-based client, collaborating closely within a cross-European team.
- Took ownership of architectural optimizations, database procedure enhancements, and major library migrations.

Greek Universities Network - GUnet

Software Engineer - Identity Management

Apr 2022 – May 2023

- Researched and developed a modern and secure European Digital Wallet implementation using Node.js & React TS, based on the OpenID for Verifiable Presentations protocol.

Software Engineering Internship

Oct 2021 – Mar 2022

- Contributed to and maintained an open-source DNS Administration project using Python Flask.

PROJECTS

vmarkop.gr | Portfolio Website

- Created a responsive and accessible Single-Page application, showcasing my academic and working experience, featuring interactive actions and file hosting.
- Built using React + TypeScript + Vite, hosted on github-pages using a custom domain, utilizing Github Actions for CI/CD.
